

Introduction to boto3 Core Concepts

- Boto3 is the official AWS SDK for Python
- Simply, Boto3 is the Python module provided by AWS to interact with AWS services using Python code
- The boto3 supports full CRUD operations across AWS services
- CRUD Means : C-Create, R-Read, U-Update & D-Delete
- Using Boto3, CRUD operations can be performed on:
 - single AWS Resource (like one IAM User, one S3 Bucket , one EC2 Instance)
 - Multiple AWS Resources (like IAM Users, S3 Buckets, EC2 Instances)
- The boto3 core concepts are:
 - Session
 - Client and Resource
 - Meta for both Client & Resource
 - Paginators and Waiters for Client
 - Actions, Sub-Resources, Collections and Few Waiters for Resource
 - Exceptions for both client and Resource Operations
