

AWS Resource Identifiers & Attributes

- Identifiers:
 - AWS Resource Identifiers are values used to uniquely reference AWS resources
 - Simply, Every AWS resource can be uniquely identified using one or more Identifiers
 - Identifiers are immutable and helpful to locate and operate on aws resources via Boto3
- Attributes:
 - Attributes are properties or metadata or configuration values of an AWS resource
 - Not all but some attributes are mutable like ec2 instance type, state, tags..

AWS Resource Identifiers & Attributes...

AWS Service	Resource Type	Identifier(s)	Mutable Attributes	Immutable (Read-Only) Attributes
EC2	Instance	<code>id</code>	<code>instance_type</code> , <code>tags</code> , <code>disable_api_termination</code>	<code>launch_time</code> , <code>availability_zone</code> , <code>platform</code>
S3	Bucket	<code>name</code>	<code>tags</code> , <code>lifecycle_configuration</code> , <code>policy</code>	<code>creation_date</code> , <code>owner</code>
	Object	<code>bucket_name</code> , <code>key</code>	<code>metadata</code> (via upload)	<code>last_modified</code> , <code>etag</code>
IAM	User	<code>name</code>	<code>tags</code> , <code>permissions_boundary</code>	<code>create_date</code> , <code>password_last_used</code>
	Role	<code>name</code>	<code>description</code> , <code>tags</code> , <code>assume_role_policy</code>	<code>role_id</code> , <code>create_date</code>
RDS	DBInstance	<code>db_instance_identifier</code>	<code>db_instance_class</code> , <code>allocated_storage</code>	<code>engine</code> , <code>instance_create_time</code>
Lambda	Function	<code>function_name</code>	<code>runtime</code> , <code>memory_size</code> , <code>timeout</code> , <code>handler</code>	<code>last_modified</code> , <code>code_sha256</code>
DynamoDB	Table	<code>name</code>	<code>provisioned_throughput</code> , <code>tags</code>	<code>item_count</code> , <code>creation_date</code>
EBS	Volume	<code>id</code>	<code>size</code> , <code>volume_type</code> , <code>iops</code>	<code>snapshot_id</code> , <code>create_time</code>
ECS	Cluster	<code>cluster_name</code>	<code>capacity_providers</code> , <code>tags</code>	<code>status</code> , <code>registered_container_instances_count</code>
